Professional Summary

Principal Engineer and Software Architect with 13+ years of experience building scalable, cloud-native systems and leading high-performing teams. Specialized in Java, Spring Boot, microservices, AWS, and Kubernetes. Proven success in system modernization, architecture leadership, and mentoring across healthcare, telecom, and enterprise SaaS domains.

Core Competencies

- System Architecture & Distributed Systems
- Cloud-Native Application Design (AWS, Kubernetes, Docker)
- Microservices Architecture & API Strategy (REST, gRPC, GraphQL)
- Event-Driven Systems (Kafka, RabbitMQ)
- Technical Leadership & Engineering Mentorship
- Agile Delivery & Product Collaboration
- CI/CD, DevOps Practices (Jenkins, Git, Maven, IaC)
- Performance Tuning & Database Optimization (PostgreSQL, MongoDB, Oracle)
- Observability: ELK, Prometheus, Grafana
- Security: OAuth2, Keycloak, OWASP Compliance
- High Availability, Fault Tolerance, Cost Efficiency
- Technical Documentation & Executive Communication

Education

Bachelor of Engineering, Computer Science, Anna University

Sep 2007 – May 2011

Experience

AthenaHealth Technology, Lead Member of Technical Staff

Chennai, IN

Cloud-native Systems | Architecture & Design | Team Leadership

Jun 2024 - Present

- Led the redesign of the rule engine architecture to support modular rule deployment, improved maintainability, and improved extensibility across product workflows.
- Participated in architecture reviews, tool evaluations, and system design discussions aligned with enterprise scalability, testability, and long-term maintainability.
- Integrated Elasticsearch with the 2.0 business rule processing system to enable efficient indexing and querying of rules authored using the DMN engine and Drools, improving rule discoverability and execution performance.
- Provided technical leadership to cross-functional teams, promoting adoption of cloud-native best practices and standardizing design principles across microservices.

Vonage Business Communications, Software Engineer III*Platform Modernization | Serverless Architecture*Remote, IN
Mar 2023 – Jun 2024

- Implemented automated solution with kubernetes for a bi-monthly activity which required fetching files from an SFTP server and disabled manual intervention
- Upgraded several legacy code bases from Java and servlets to a modern framework-based approach with Spring-based cloud solutions along with usual API development.
- Designed and implemented multiple minor functionalities as serverless function with AWS lambda

Comcast Technology Solutions, SDE 4*Architecture & Mentorship | Observability | Platform Design*Chennai, IN
Aug 2020 – Mar 2023

- Worked on sales pitches and onboarded 4+ customers with necessary artifacts, poc and demo
- Mentored a team of 10+ engineers, fostering a culture of clean code, design patterns, and scalable solutions.

Tata Consultancy Services, Assistant Consultant*Team management/Lead Engineer : Contribute, manage, groom and mentor*Chennai, IN
Jan 2019 – Jul 2020

- Implemented in-house integration of security services for payment processing.

Cognizant Technology Solutions, Associate*Monolith to Microservices Migration | Java, Spring Boot*Coimbatore, IN
Jan 2015 – Oct 2018

- Migrated a monolithic application to microservices and mitigated the performance issue which was causing a major concern across the dealers using multiple apps.
- Implemented a project with Spring boot, Angular and OracleDB which enabled the users to receive the items directly to the location thus saving over a million dollar on logistics.

Infosys Limited, Systems Engineer*Backend Development | QA Automation*Trivandrum, IN
Sep 2011 – Dec 2014

- Contributed to the development and testing of CRM/ERP platforms; improved deployment reliability and QA efficiency.

Technical Skills

Languages: Java, Groovy, Python, SQL, TypeScript, Shell**Technologies:** Spring Boot, Spring Cloud, Hibernate, Angular, JUnit**Cloud:** AWS, GCP (exposure), Kubernetes, Docker**Messaging:** Apache Kafka, RabbitMQ**Databases:** PostgreSQL, MySQL, MongoDB, Oracle, DynamoDB**Observability:** ELK, Prometheus, Grafana, AppDynamics**DevOps & Tools:** Git, Jenkins, Maven, IntelliJ, JaCoCo, PrismaCloud, Veracode**Security:** OAuth 2.0, Keycloak, SAML**Architecture:** REST APIs, gRPC, CI/CD, 12-Factor App Principles
